

Giwon Bahg

POSTDOCTORAL FELLOW · COMPUTATIONAL COGNITIVE SCIENCE

Moore Building 469A, 138 Fischer Road, University Park, PA, 16802

✉ gjb5752@psu.edu | 🏠 giwonbahg.github.io | 🎓 Google Scholar: Giwon Bahg

Education & Employment

Postdoctoral Scholar, Department of Psychology, Pennsylvania State University

ADVISOR: DR. ROGER BEATY

State College, Pennsylvania, USA

Sep. 2025 - Present

Postdoctoral Fellow, Department of Psychology, Vanderbilt University

ADVISOR: DR. THOMAS J. PALMERI

Nashville, Tennessee, USA

Jan. 2022 - Aug. 2025

Ph.D. in Psychology, The Ohio State University

ADVISOR: DR. BRANDON M. TURNER

- Dissertation Title: The Effects of Personalization on Category Learning

Columbus, Ohio, USA

Aug. 2016 - Dec. 2021

Master of Science in Statistics, The Ohio State University

Aug. 2017 - Dec. 2021

Master of Arts in Psychology, Seoul National University

ADVISOR: DR. JOOYONG PARK

- Thesis Title: The Effect of Strategy Instruction on Promoting Analogy Use in Problem-solving Settings

Seoul, Republic of Korea

Mar. 2013 - Feb. 2015

B.A. in Psychology & B.A. in Philosophy, Seoul National University

SUMMA CUM LAUDE

- Minor: Brain-Mind-Behavior Program

Seoul, Republic of Korea

Research Interests

Computational Cognitive Science

I study **how representations of concepts and categories interact with attention, information search, decisions, and other higher-order cognitive activities**, inhibiting or reinforcing each other. This interest in the bidirectional relationship between learning and higher-order cognition also connects me to studies of **active learning** in which cognitive agents explore what to learn by themselves. I use **computational cognitive modeling** as a major research tool.

- How learning guides categorization, information search, problem-solving, and creative processes (and vice versa)
- Human-algorithm interaction
- Active learning
- Bayesian cognitive modeling

Integrative Cognitive Modeling & Model-based Cognitive Neuroscience

Cognitive processes are manifested in the brain and behavior across various levels (e.g., physiological and hemodynamic neural measures, eye movement, choice, and natural language), each of which sheds light on cognition from distinct perspectives. I use cognitive models and machine learning techniques to **understand the underlying common cognitive processes from diverse levels of manifestations**. **Simultaneous modeling of neural and behavioral data** is my current interest.

Current Projects

Can cognitive models bridge the temporal dynamics of neuro- and electrophysiology?

- Can a neurophysiologically motivated cognitive model describe the electrophysiological measures of cognition?
- Attention-driven visual search processes and the N2pc event-related potential component

Can multi-stage decision processes be decomposed using behavioral data?

- Modeling multi-stage visual decision processes using evidence accumulation models

Suboptimal learning in the human-environment interaction

- How do computer-generated recommendations fine-tuned to individuals distort category representations?

- How can biased category learning be corrected? Do algorithms offer counterbalancing solutions?

Teaching

Academy of College Teaching

Nashville, Tennessee, USA

THE INSTITUTE FOR THE ADVANCEMENT OF HIGHER EDUCATION & THE GRADUATE SCHOOL, VANDERBILT UNIVERSITY

May 20, 2025 - June 17, 2025

- Completed a comprehensive, non-credit online course focused on college-level course design, inclusive pedagogy, and evidence-based teaching strategies. Topics included developing assessments, engaging diverse learners, implementing learning objectives, and lesson planning. Awarded participation badge for course completion.

Graduate Teaching Assistant

Columbus, Ohio, USA

DEPARTMENT OF PSYCHOLOGY, THE OHIO STATE UNIVERSITY

Aug. 2018 - Dec. 2021

- Psychology of Emotion
- Data Analysis in Psychology
- Introduction to Cognitive Neuroscience
- Psychology of Creativity
- Research Methods in Psychology
- Perception & Sensation, Memory & Cognition, Introduction to Cognitive Sciences
